

LICENCE INTERNATIONALE

**Biosourcing: use and
transformation of
bioresources**

LICENCE INTERNATIONALE : Minor BIOSOURCING

The program presents options for the use and transformation of bioresources as an alternative to non-renewable resources.

Moreover, the program provides knowledge on innovation and sustainable resource management.

Designed with significant advice from industry partners

Main part of major companies (I'Oreal, BASF, Dow, Solvay, Procter & Gamble, DuPont,...) are currently working in this area, and an increasing number of smaller companies are also involved with the use and transformation of bioresources
